

Founded in 2019, Liberty Road Capital is a world class digital asset manager, specialising in yield enhancement strategies for digital currencies, especially Bitcoin and Ethereum. The team has decades of experience in asset management, investment banking and digital and blockchain business. Liberty Road offers three strategies; 1. A Covered Call strategy that uses zero leverage. 2. A Negative Gamma Strategy that utilises up to 3x leverage, trading the ethereum volatility surface with a directional bias depending on fundamental blockchain analysis and 3. A full ETH volatility trading program that buys and sells ethereum calls and puts, arbitrages the volatility surface and arbitrages across products.

LRC is an approved investment manager in the Virgin Islands by the BVI Financial Services Commission (“the Commission”), under the Securities and Investment Business Act, 2010 (“SIBA”)

## Background and Investment Strategy

The Liberty Road Covered Call strategy utilises world class quantitative methods to map a live volatility surface from individual exchanges, and produces both individual exchange and combined volatility surfaces.

A proprietary Artificial Intelligence programme then analyses the volatility surface and maximizes the risk premium obtain by selling calls at the peaks on the volatility surface. Strikes and maturity are laddered to minimize concentration, and risk is capped at a leverage of 1:1

The strategy may be partly in cash in the event of market conditions that signal a potential rise in ETH versus the USD.

The portfolio is monitored 24 hours a day 7 days a week, and trades are always evaluated and executed by an experienced portfolio manager.

Liberty Road offers investors the ability to monitor their portfolio returns in real time via an investor portal login.

Liquidity varies by allocation size, ranging from daily to monthly for large investments.

### Risk Oversight

Risk is actively managed. The portfolio adopts forward looking EVaR limits, proprietary risk evaluation addressing left hand tail risk and incorporates Extreme Value Theory.

ETH Covered Call Strategy - Gross			
Annualised Return	112.0%	Annualised Risk	34.7%
6 Month Rolling Return	-0.28%	Sharpe Ratio	3.21
3 Month Rolling Return	-0.77%	Skewness	1.1
