

BTC ACTIVE TREASURY CC & CP STRATEGY

Established in 2019, Liberty Road Capital is a premier digital asset manager specialising in yield enhancement strategies for digital currencies such as Bitcoin and Ethereum. Boasting decades of collective experience in asset management, investment banking, and the digital and blockchain sectors, our team brings a wealth of knowledge to the evolving landscape of digital asset investments.

Programme Overview

The Liberty Road Active Treasury programme is a low-risk programme which targets 5 - 7% annualised volatility with a targeted Sharpe Ratio of 2.

It employs Artificial Intelligence and Machine Learning to dynamically and actively turns the portfolio over seeking opportunities on the BTC volatility surface in real time.

Distinguished from traditional offerings, the Active Treasury program sets itself apart with a higher entry threshold (over 90% success rate on the AI backtesting) and a unique volatility target.

Strategy

The Liberty Road Active Treasury is a combination of the Covered Call (CC) and Covered Put (CP) strategy. A proprietary Artificial Intelligence program analyses the BTC volatility surface and maximises the risk premium obtained by selling calls or selling puts at the peaks on the volatility surface. It utilises world-class quantitative methods and machine learning algorithms to back-test the success rate of any identified trade as a trade filter.

Once a trade passes this filter, it is executed. The allocation is split between Calls and Puts based on a medium-term proprietary directional indicator. In a bull market, more is allocated to CP, while in a bear market, more is allocated to CC.

Key Informations

Launch date	1 Jan 2022	Average Duration	0.25-12 months
Investment vehicle	Cold Wallet	Max Leverage	1x
Liquidity	Daily/Weekly/Monthly	Currency Exposures	BTC/USD
No. of holdings	5-10	Asset Classes	BTC
