Founded in
2019

Focused on
Yield Generation

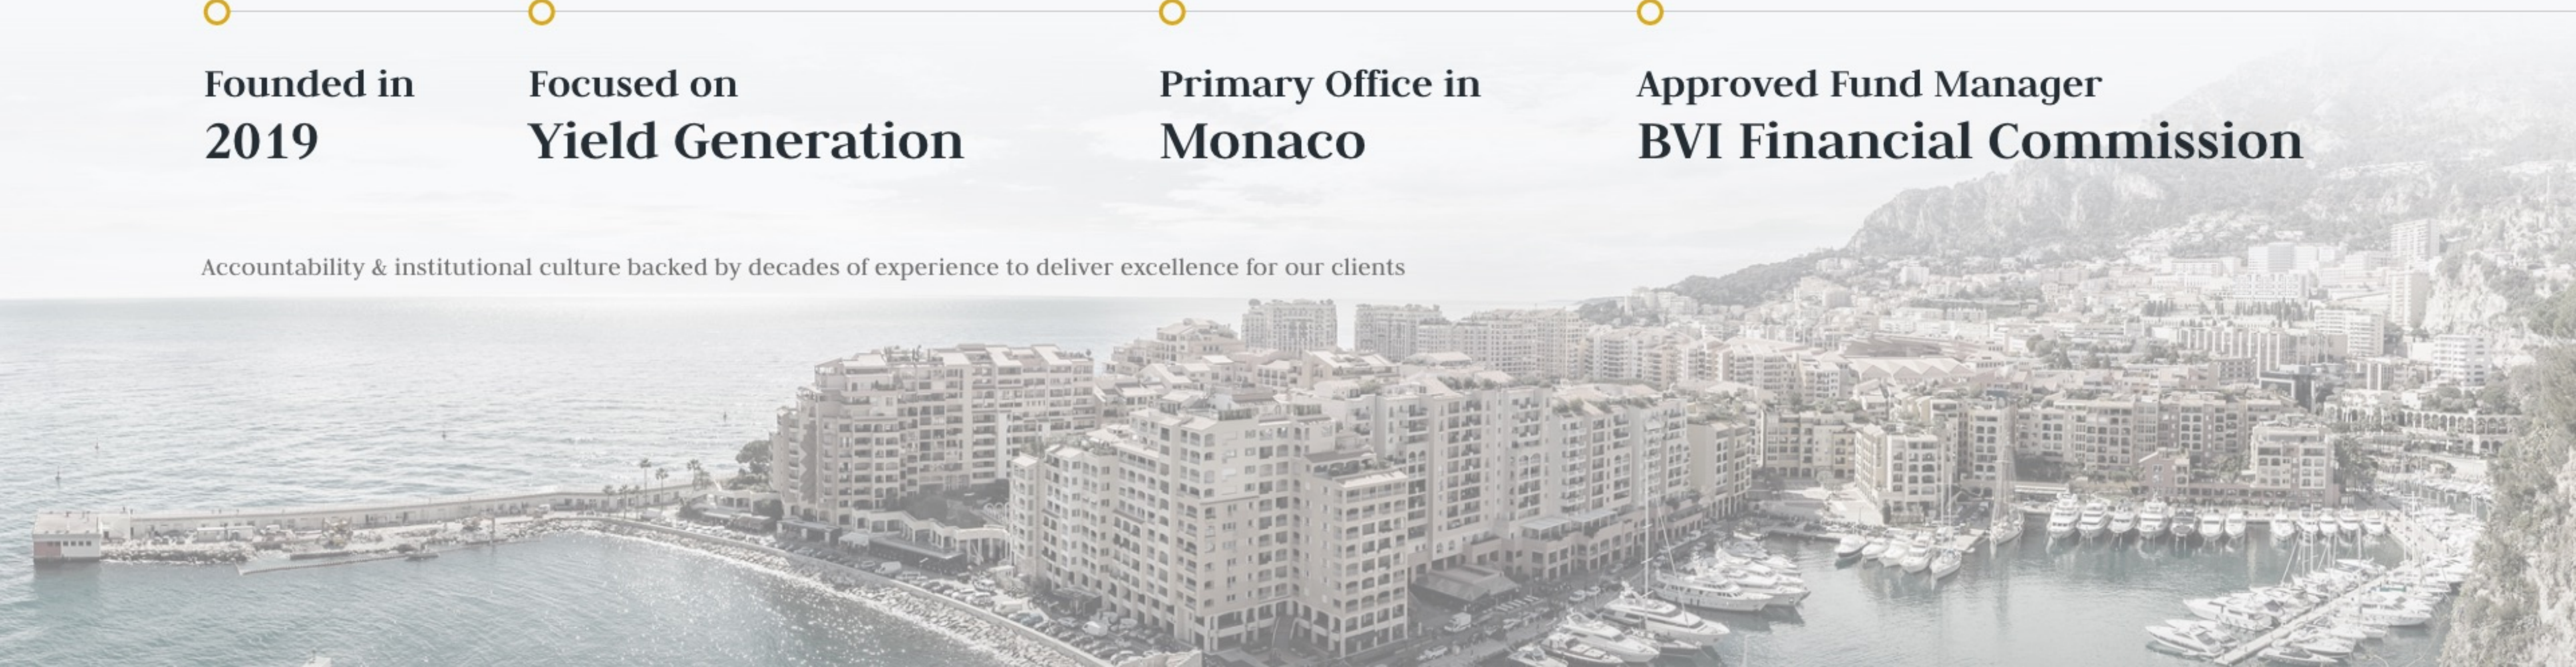

Primary Office in
Monaco

Approved Fund Manager
BVI Financial Commission

Accountability & institutional culture backed by decades of experience to deliver excellence for our clients

Investment Philosophy

Yield generation for cold wallet bitcoin balances

Strategy:

- ✧ Identify opportunities on the volatility surface
- ✧ Exploit arbitrage opportunities in key derivatives markets such as cash vs perpetuals, futures and cross exchange
- ✧ Incorporating AI and quantitative methodologies and

Key Themes:

- ✧ World class risk management utilising the best risk management tools
- ✧ 24/7 portfolio management via an exceptional portfolio management team
- ✧ State of the art security and custody solutions where digital assets remain under the ownership and control of the investor in cold wallets

The Opportunity

More and more companies need **treasury management** to generate yield for their **BTC holdings** while monetising volatility and risk hedging. BTC revenue generation options available on the market:

Features	Borrowing/Lending	Staking/Mining	WBTC/Liquidity pools	LRC Active Treasury
Counterparty Risk (exchange risk, eg. what happened to FTX)	MEDIUM	HIGH	MEDIUM	NO RISK
No Cyber Security Risk (hacking risk)	✗	✗	✗	✓
Costs attached	LOW	HIGH	HIGH	LOW
Liquidity Risk	HIGH	HIGH	HIGH	LOW
Consistent Returns (5% and up)	✗	✗	✗	✓
Control of the risk /portfolio	✗	✓	✗	✓
Full Control and the ownership of assets (Copper)	✗	✗	✗	✓

LRC Active Treasury is a **one-of-a-kind tool for enhancing yield**, offering **low risk** and a targeted **annualised return of over 10 %**.

AI & Machine Learning

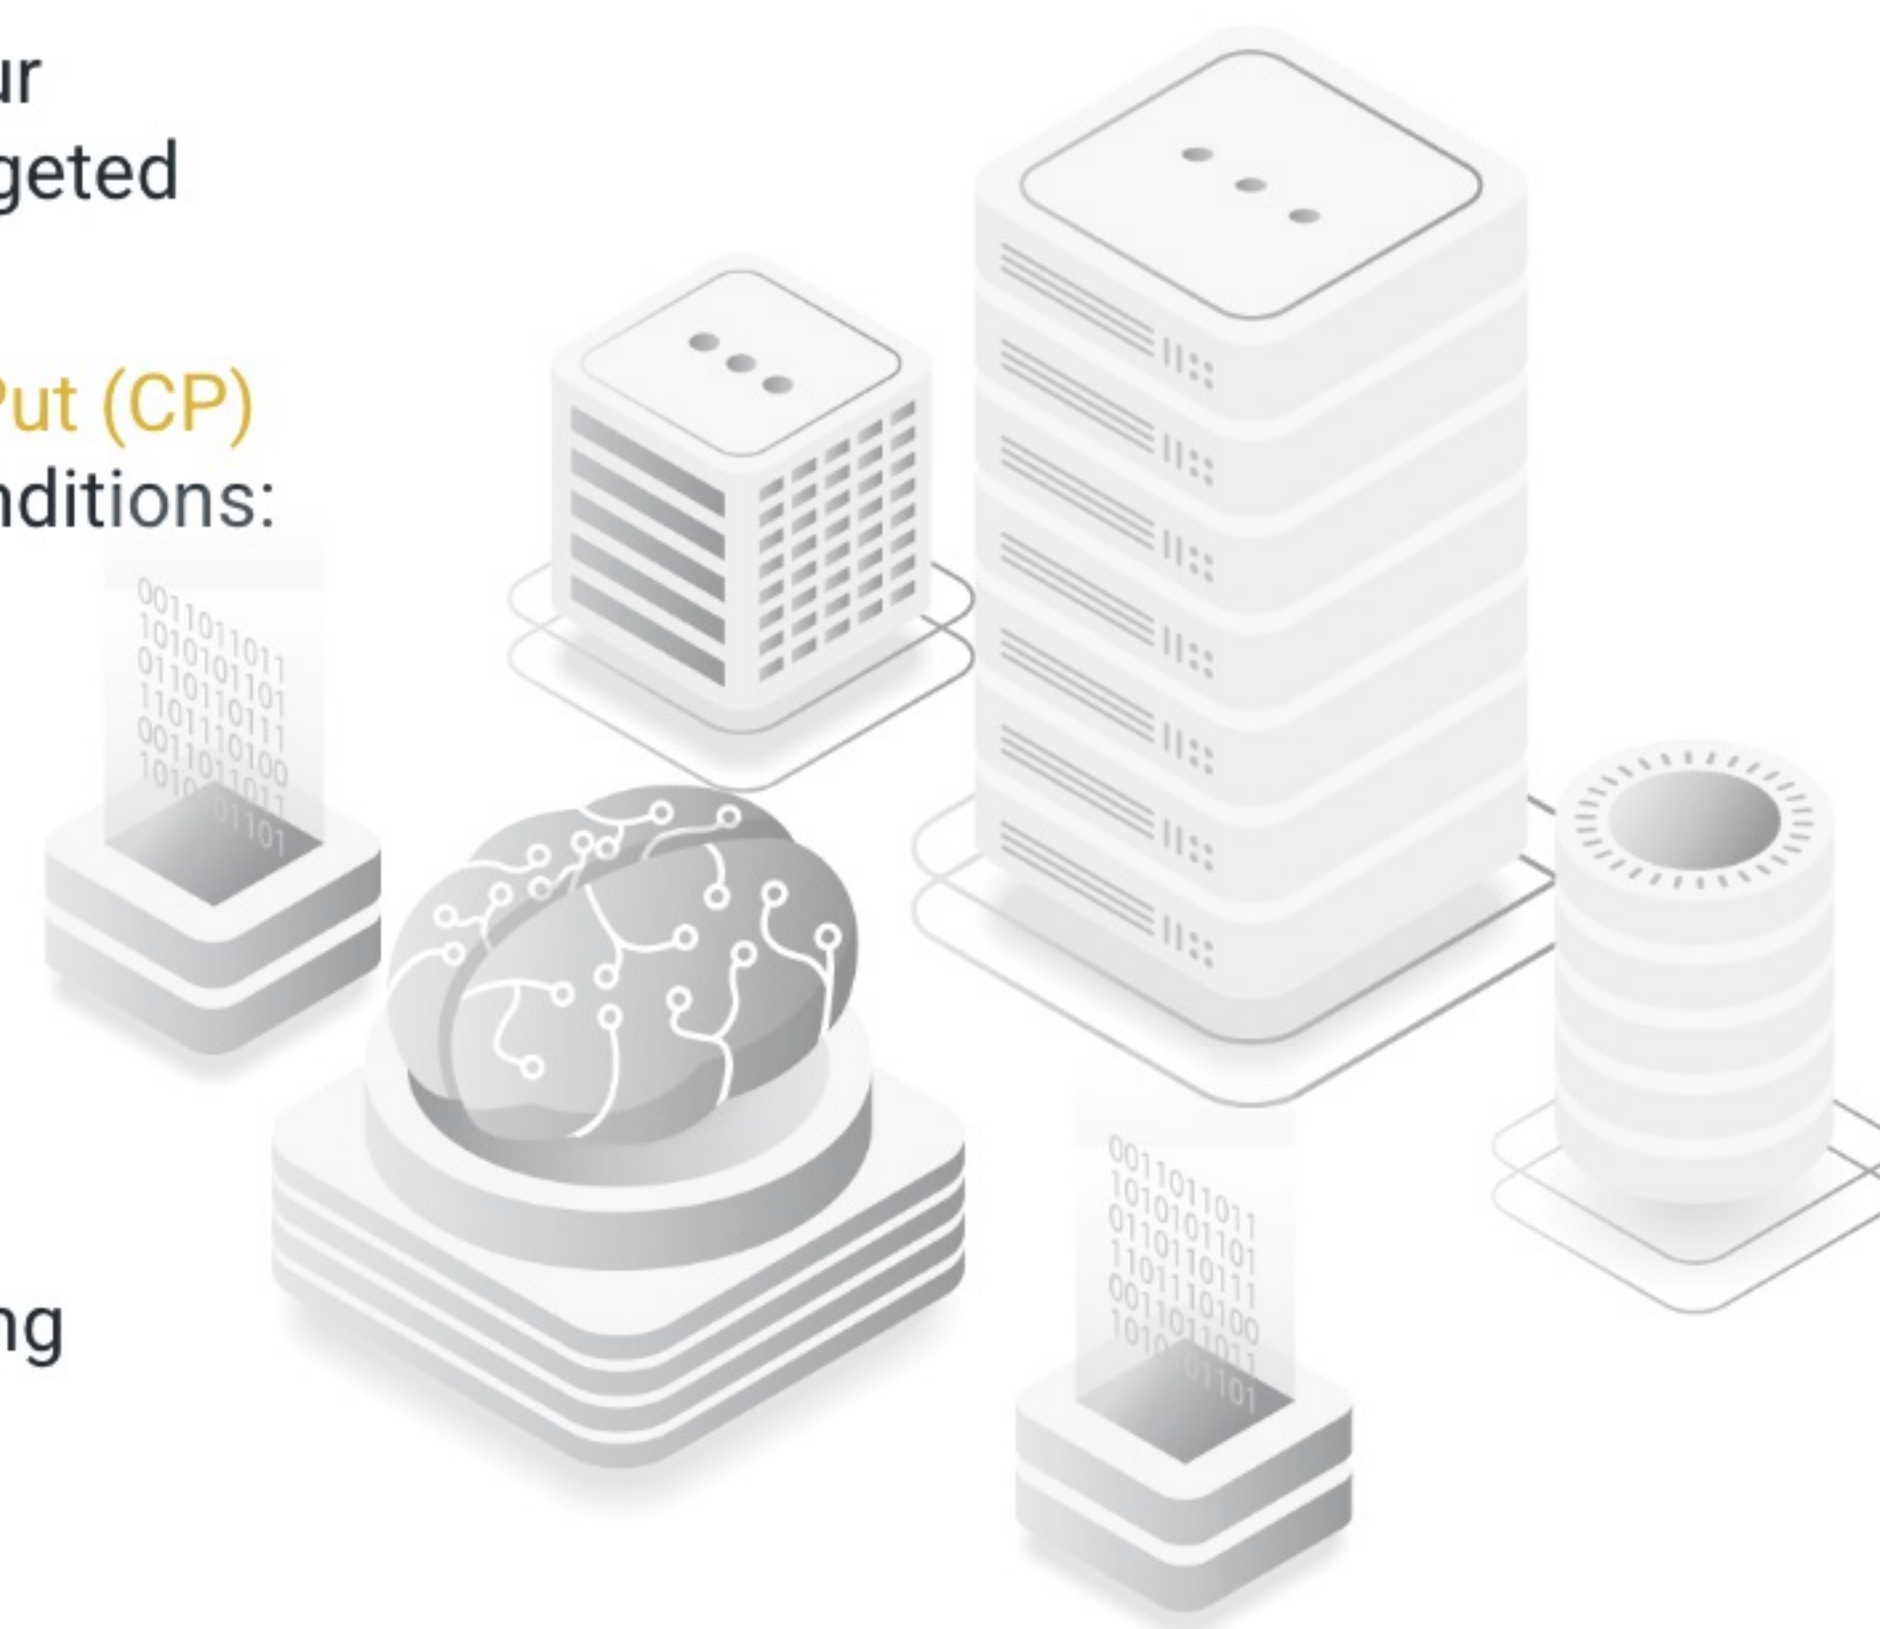

The **Liberty Road Active Treasury 3X programme** is a leveraged version of our Active Treasury strategy and targets sub 15% annualised volatility with a targeted Sharpe Ratio of 2+.

The Active Treasury Strategy combines the **Covered Call (CC)** and **Covered Put (CP)** strategies, with a flexible allocation split of 70% to 30% based on market conditions:

Market Conditions	70% Allocation	30% Allocation
Bullish Market	CP	CC
Bearish Market	CC	CP

A proprietary **AI programme** :

- 🦁 Monitors and assess market direction by screening indicators and conducting fundamental analyses of the blockchain.
- 🦁 Runs **ML algorithm** for trade signaling utilising world class quantitative methods that **back-test the success rate (over 90%)** of any identified trade signal.

Process Overview

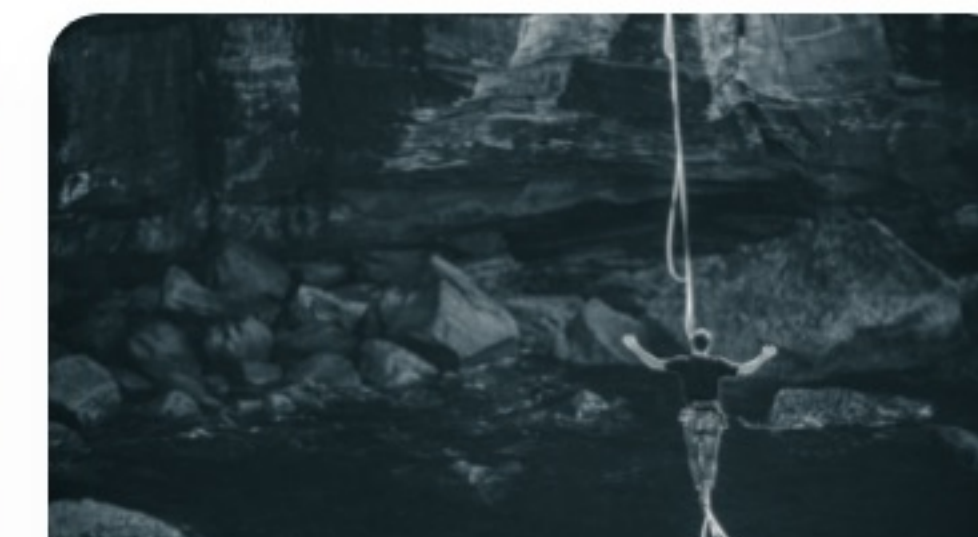

Institutional Infrastructure

Secure. Frictionless. Ownership remains with Investor.

Investment Opportunity

Live opportunities identified by AI. Volatility Surface. Arbitrage via Product, Curve, Exchange.

Risk Management Procedures

Embedded in the investment process. Extreme Value Theory, Overseen by AI.

Client Funds

- ✦ Ownership retained
- ✦ Real-time monitoring
- ✦ Secure wallets & cold storage
- ✦ No movement of assets

Investment

- ✦ Algorithmic Arbitrage
- ✦ Live Volatility Surface
- ✦ Artificial Intelligence

Risk Management

- ✦ Extreme Value Theory
- ✦ EVAR
- ✦ Live constantly monitored Greek limits

Portfolio Management

- ✦ World Class PM team
- ✦ 24/7 management

Operations

- ✦ Monthly liquidity
- ✦ Daily Portfolio Visibility

Digital Infrastructure

100% Secure. Zero Credit Risk. No Counterparty Risk.

SECURE COLD WALLET CUSTODY

All funds are retained by investor in a dedicated secure offline cold wallet

Assets are virtually delegated and traded out of cold storage with ClearLoop™ - a trusted settlement network

OFF-EXCHANGE SETTLEMENT

Settlement takes place in real time, and a hold or credit is placed against cold wallet which is periodically settled by client

CRYPTO DERIVATIVES EXCHANGE

The LRC Asset Manager trades the portfolio under an Investment Management Agreement, but is not able to move assets from wallet

Risk Management

Investment Management Process

Liquidity Risk

- Real-time monitoring of liquidity
- Strategic long bias positions

Counterparty Risk

- Cold storage
- Sophisticated MPC wallet
- 2 of 3 signature control
- 2 keys retained by coin owner

Event Risk

- Tactical hedging of tail risk events
- Strict risk limits & internal protocols

Technical Default Risk

- Ongoing engineering analysis of digital assets
- Real-time onchain data feeds and analytics

Best practices

- No single person, server, vault location or device failure can compromise our operations
- MPC wallet authorization for fund access
- Exchange partners rigorously selected based on data security practices & management
- Short term positions managed with strictly imposed risk limits
- Mitigating exposure via e-wallets, exchange accounts & other counterparty risks
- Overseen by independent risk management committee

Active Treasury 3X BTC Performance
