

Digital Asset Management

LIBERTYROAD
CAPITAL

Firm Overview

Liberty Road Capital is a British Virgin Islands based Approved Investment Manager, under the Securities and Investment Business Act, 2010 (“SIBA”).

Founded in
2019

Focused on
Yield Generation

Primary Office in
Monaco

Approved Fund Manager
BVI Financial Commission

Accountability & institutional culture backed by decades of experience to deliver excellence for our clients

The Vision

- ✦ World class **yield enhancement** for idle digital asset balances held on balance sheet
- ✦ Institutionally focused structure & oversight protocols for effective **risk management**
- ✦ **Capitalizing** on market inefficiencies, arbitrage opportunities and data driven insights
- ✦ **Zero counterparty risk** using the latest cold wallet protocols, with assets held off exchange in cold wallets
- ✦ Proven **team experience** in funds management and the crypto industry

The Opportunity

- ✦ Large inefficiencies exist in digital asset derivatives markets
- ✦ Large risk premiums are available with low risk
- ✦ Volatility options surface offers huge opportunities due to market inefficiencies
- ✦ Recent advancements in technology eliminate the credit risk of having assets held by exchanges

Volatility option surface has huge opportunities for low risk profits to provide yield enhancement for investors with idle digital asset balances.

Bitcoin Implied Volatility Surface

Products

Programs	Targeted Sharpe Ratio	Targeted Annualised Return	Risk Level
Active Treasury (CC + CP)	2.0	10-12%	Very Low
Active Treasury 3X	2.0+	15%	Low

Investment Philosophy

Strategy

- ✦ Identify opportunities on the volatility surface
- ✦ Exploit **arbitrage** opportunities in key derivatives markets such as cash vs perpetuals, futures and cross exchange
- ✦ Incorporating **AI and quantitative methodologies** and tools to identify opportunities

Key Themes

- ✦ World class **risk management** utilising the best risk management tools
- ✦ **24/7 portfolio management** via an exceptional portfolio management team
- ✦ State of the art **security and custody** solutions where digital assets remain under the ownership and control of the investor in cold wallets

Process Overview

Institutional Infrastructure

Secure. Frictionless. Ownership remains with Investor.

Investment Opportunity

Live opportunities identified by AI. Volatility Surface. Arbitrage via Product, Curve, Exchange.

Risk Management Procedures

Embedded in the investment process. Extreme Value Theory, Overseen by AI.

Client Funds

- ✦ Ownership retained
- ✦ Real-time monitoring
- ✦ Secure wallets & cold storage
- ✦ No movement of assets

Investment

- ✦ Algorithmic Arbitrage
- ✦ Live Volatility Surface
- ✦ Artificial Intelligence

Risk Management

- ✦ Extreme Value Theory
- ✦ EVAR
- ✦ Live constantly monitored Greek limits

Portfolio Management

- ✦ World Class PM team
- ✦ 24/7 management

Operations

- ✦ Monthly liquidity
- ✦ Daily Portfolio Visibility

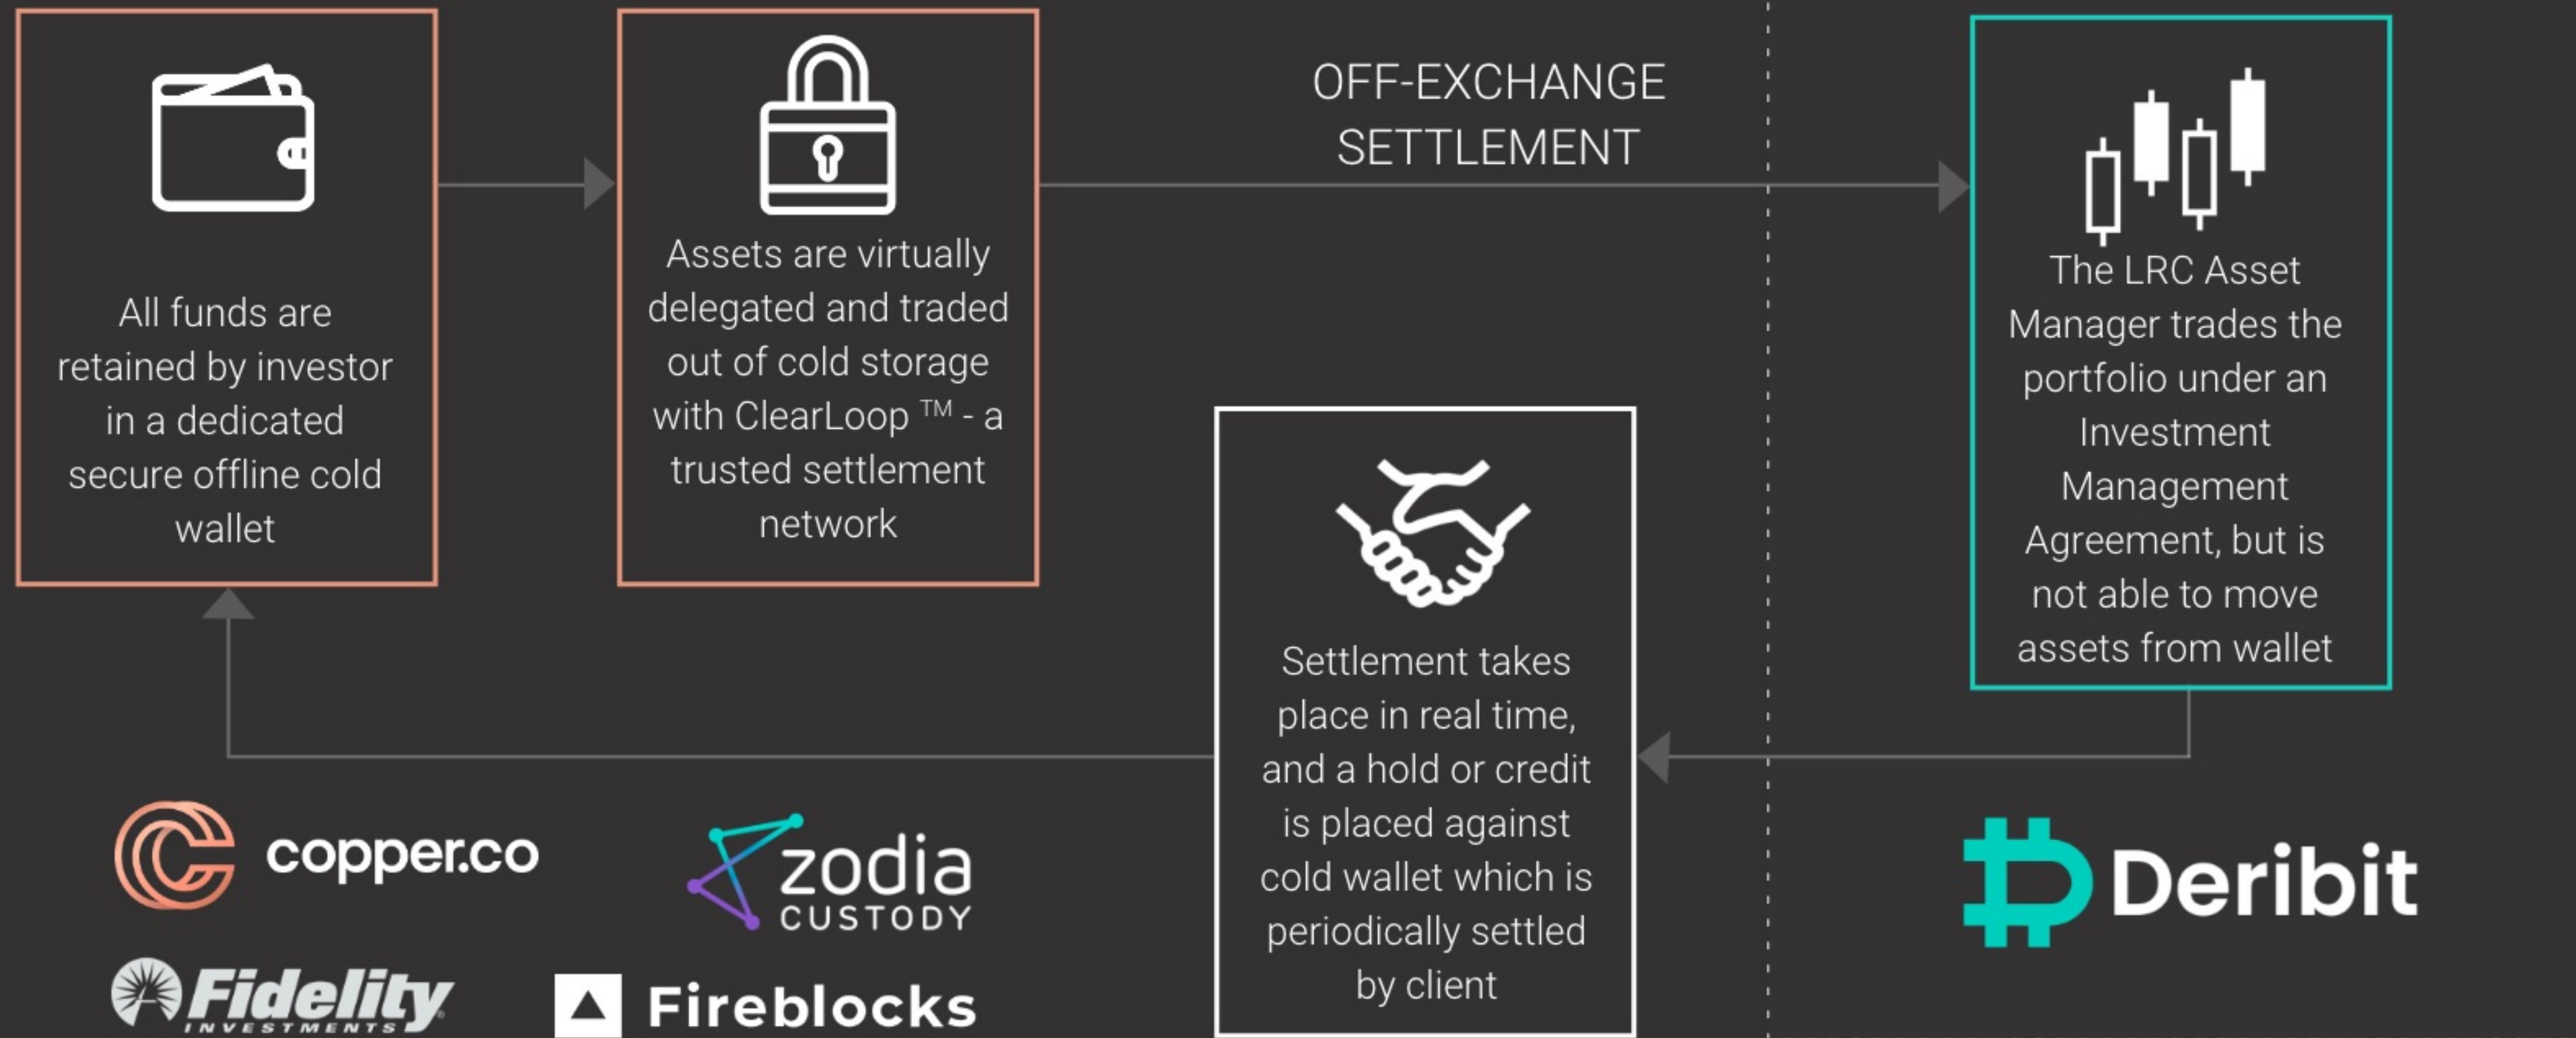

Digital Infrastructure

100% Secure. Zero Credit Risk. No Counterparty Risk.

SECURE COLD WALLET CUSTODY

CRYPTO DERIVATIVES EXCHANGE

Risk Management

Investment Management Process

Liquidity Risk

- ✦ Real-time monitoring of liquidity
- ✦ Strategic long bias positions

Counterparty Risk

- ✦ Cold storage
- ✦ Sophisticated MPC wallet
- ✦ 2 of 3 signature control
- ✦ 2 keys retained by coin owner

Event Risk

- ✦ Tactical hedging of tail risk events
- ✦ Strict risk limits & internal protocols

Technical Default Risk

- ✦ Ongoing engineering analysis of digital assets
- ✦ Real-time onchain data feeds and analytics

Best practices

- ✦ No single person, server, vault location or device failure can compromise our operations
- ✦ MPC wallet authorization for fund access
- ✦ Exchange partners rigorously selected based on data security practices & management
- ✦ Short term positions managed with strictly imposed risk limits
- ✦ Mitigating exposure via e-wallets, exchange accounts & other counterparty risks
- ✦ Overseen by independent risk management committee

Team
